

LANDSCAPING

servest

From design, to planning, to construction, we create and maintain striking, eco-friendly, and natural landscapes, sporting and recreational facilities.

ENVIRONMENTAL

We create environmental sustainability through innovation. By doing so, we assist you with delivering spectacular landscapes, while meeting environmental compliance standards. In mitigating environmental impacts, our biodiversity restoration experience and expertise, allows you the opportunity to benefit socially and economically, by providing a service that is accredited by an Ecocert biodiversity certification.

Our services include:

Consulting

- Environmental surveys and assessments
- Biodiversity certification
- Environmental management plans, systems and policies
- Ecological master planning and design

Environmental management services

- Rehabilitation and restoration of natural/wilderness areas
- Alien plant eradication
- Organic sustainable maintenance approach
- Erosion control

Waste management

- Waste management plans and strategy
- Collection, separation and recycling
- Composting

Water management

- Storm water management
- Biological effluent treatment (constructed wetlands, bio-filters and polishing ponds)
- Waterwise strategies
- Wetland and riparian rehabilitation

MAINTENANCE

We have more than 25 years of experience in designing, installing and maintaining landscapes of all sizes. With more than 40 Horticulturists nationally, you will have peace of mind knowing that your landscaping needs are professionally maintained. With our in-house design teams we aim to continuously transform your landscapes to incorporate international trends.

Our services include:

- Full lawn and flowerbed maintenance
- Planting of focal point plants/annual colour plants

- Firebreaks around perimeter fences
- Conveyor belt spillage cleaning
- Control of invasive plant species
- Rehabilitation
- Environmental management
- Landscape consulting
- Worm farms
- Composting systems
- Roof gardens
- Vertical gardens
- Veggie gardens

GOLF COURSE DESIGN & IMPLEMENTATION

We are passionate about golf courses and believe in partnering with our clients, to create relationships based on transparency and trust. To bear testimony to this, we currently enjoy partnerships that have lasted over 15 years, and maintain some of the finest properties in South Africa, and across the border of Swaziland.

Our greenkeepers work closely together to constantly share ideas and best practices. In order to ensure we keep abreast of international standards, we select two greenkeepers every year to spend a few weeks helping to prepare TPC Sawgrass for the Players Championships in the USA. This is a privilege we have experienced for the past 6 years. We believe in fostering close relationships with all of our clients, ensuring that any client concerns are dealt with in a swift and effective manner, leaving the on the ground colleagues free to attend to their day to day activities.

Our key prestigious golf courses include:

- Blue Valley
- Centurion Golf Estate
- Eye of Africa
- Kriel Golf Course
- Metropolitan Golf Course
- Greenside Colliery Golf Club
- Royal Swazi Sun
- Paarl Golf Course
- Liesbeek Leisure
- Greenways
- Landow Golf Club

TURF

Crafting and maintaining great playing facilities is about the love of the game, and the pursuit of excellence. For this reason, we have created one complete turf solution to maintain the highest standards in sporting and leisure facilities, using either natural or artificial turf.

We provide complete turf solutions across South Africa and Sub-Saharan Africa, giving you turnkey solutions from design and layout, to earthworks, shaping, grassing and irrigation. We're able to bring you unrivalled products by collaborating with global partners, achieving FIFA and FIH certification.

Some of our capabilities include:

- Golf courses
- Athletic stadiums
- Soccer fields
- Rugby fields
- Hockey fields/astro
- Netball and tennis courts
- Bowling greens
- Cricket pitches
- 5-a-side artificial sports pitches

The creation of the above turf solutions are supported by our expertise in the following areas:

- Sports field construction and maintenance
- Decompaction and scarification
- Foreign grass treatment programs
- Herbicides and pesticide applications
- Hollowtyning and vertidrainage
- Over seeding
- Pitch renovation
- Spring treatment
- Contract mowing

CONSTRUCTION

Our experience in design, installation, maintenance, and management of landscapes, has refined our capabilities in greening your environment with our artistic landscaping. We manage all aspects from breaking ground to the completion of the project, whether it is natural plant-scaping or artificial turf.

The environment and its integrity is important to us, so our dedicated in-house environmental department will complete an Environmental Impact Assessment, to ensure it is looked after.

Our construction services include:

- Landscapes
- Water features and dams
- Irrigation systems
- Transplanting of large trees
- Wet lands
- Boulevards
- Tennis courts
- Multi courts
- Golf courses
- Sport fields
- Urban parks
- Play areas
- Roof top gardens
- Vertical gardens
- Hardscaping
- Composting systems
- Greenhouses

ARTIFICIAL TURF

We provide high standard synthetic turf solutions, and have installed over 150 turfs nationally and across borders. Our turnkey solution includes design, earthworks, base construction and top layer fencing options. We're able to bring you unrivalled products by collaborating with global partners, achieving FIFA and FIH certification.

Our services include:

- Soccer fields
- Rugby fields
- Hockey fields
- Cricket pitches
- Athletics grounds
- Multi-purpose fields
- 5-a-side artificial sports pitches
